As a happy subscriber to the XMRadio network I find it very alarming that the FCC would even consider such a petition by the NAB. The United States is built upon a general hands-off policy by the Federal Government with regards to the business world. As a PAYING subscriber to the XMRadio network I should be able to listen to what I want. The main reason myself and most other consumers have chosen XM is because the NAB has not listened to customer demands such as variety of music and less commercial advertisement. I strongly urge you to reject this petition. If the NAB feels so threatened by satellite radio, perhaps it is time that the NAB start making changes to the current ways in which they operate.
